

Highly Specialized Staff

The company guarantees the quality of its products thanks to its professional team, highly specialized in assembling magnetic cores according to customers' specifications.

Precision Cutting

Transelit Int. uses dedicated CNC cutting lines to ensure maximum precision and dimensional consistency, guaranteeing optimal performance.

Different Solutions

CORE CUTTING MACHINES

CUT-TO-SIZE LAMINATIONS

CORE ASSEMBLING TABLES

ASSEMBLED CORES

Constant Quality Control

The company carefully monitors the entire production process - from coil cutting to final testing and shipment - ensuring consistent safeguarding of the final quality.

Packaging & Shipment

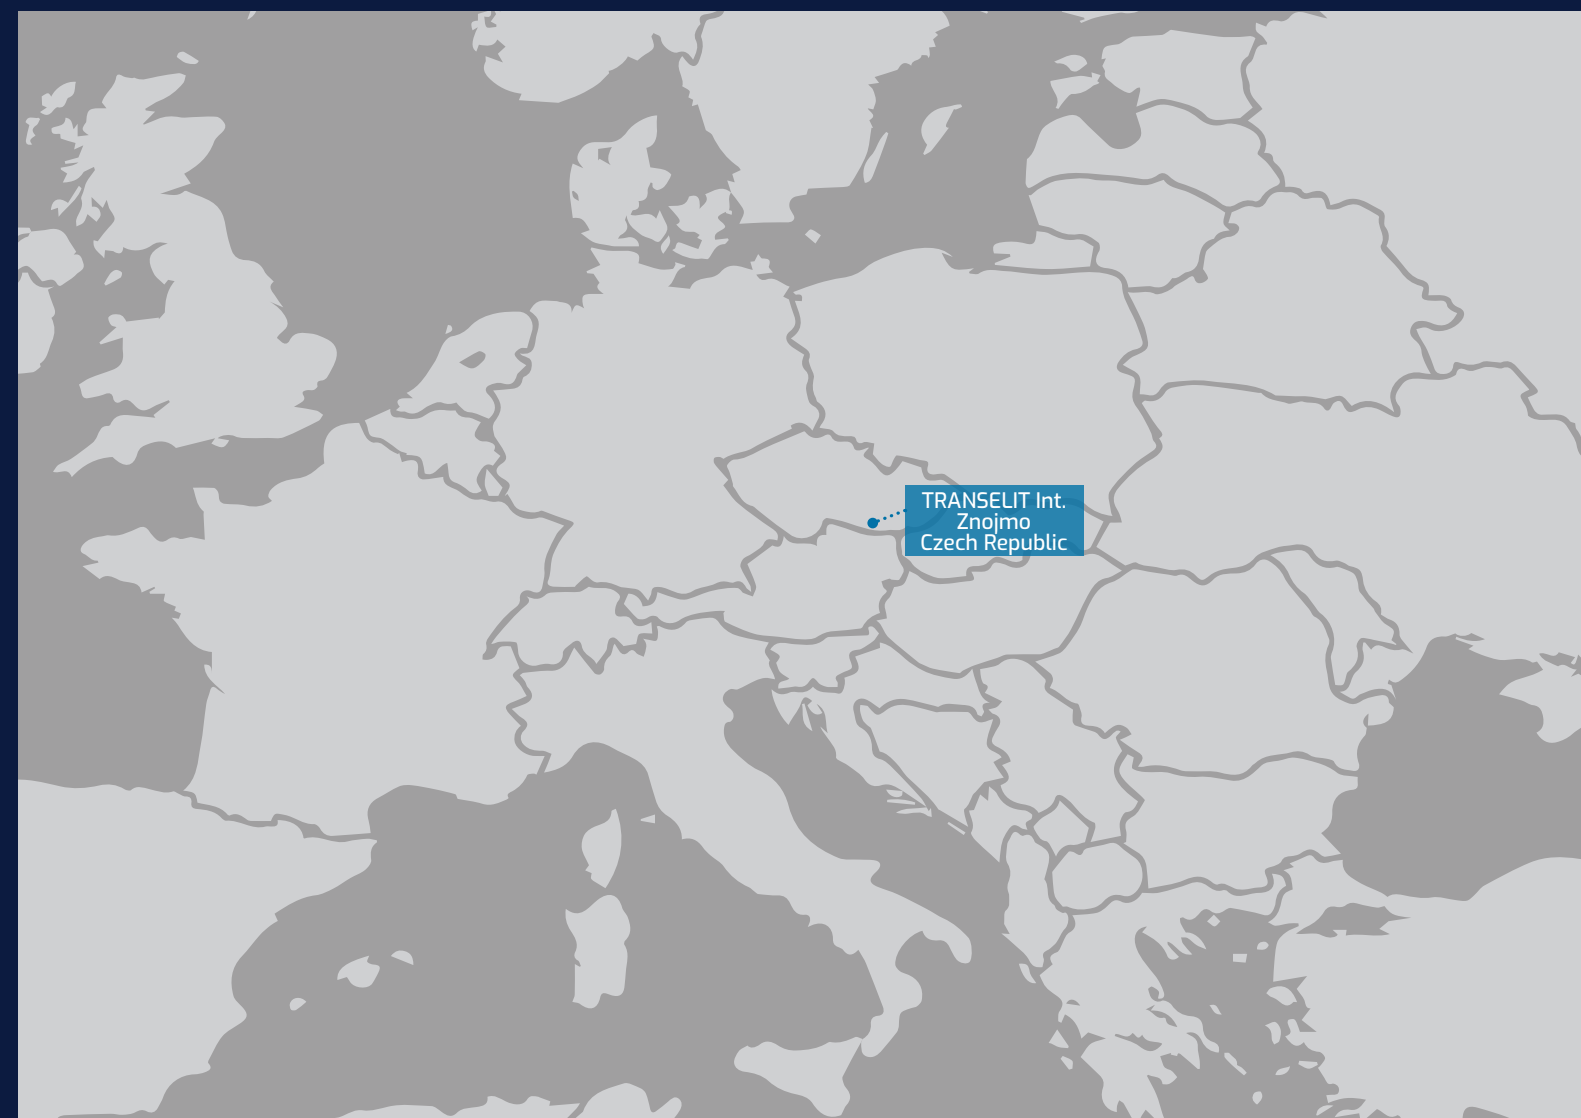

Our packaging is designed to prevent any issues during transport. The type of packaging is selected according to the means of transportation (truck, rail, ship), the duration of transit, and climatic conditions. We typically use PE sheeting for protection against dirt and moisture, along with VCI paper to prevent corrosion caused by condensation.

Products

Thanks to its extensive experience and state-of-the-art equipment, Transelit Int. has established itself as a key player in the market for low-voltage and traction transformer cores.

The product range includes preassembled core blocks, 90° cut laminations, and fully assembled cores.

Every product is manufactured according to customer specifications, ensuring customized solutions and the highest level of service.

Magnetic Cores for Low Voltage and Traction Transformers

Company Overview

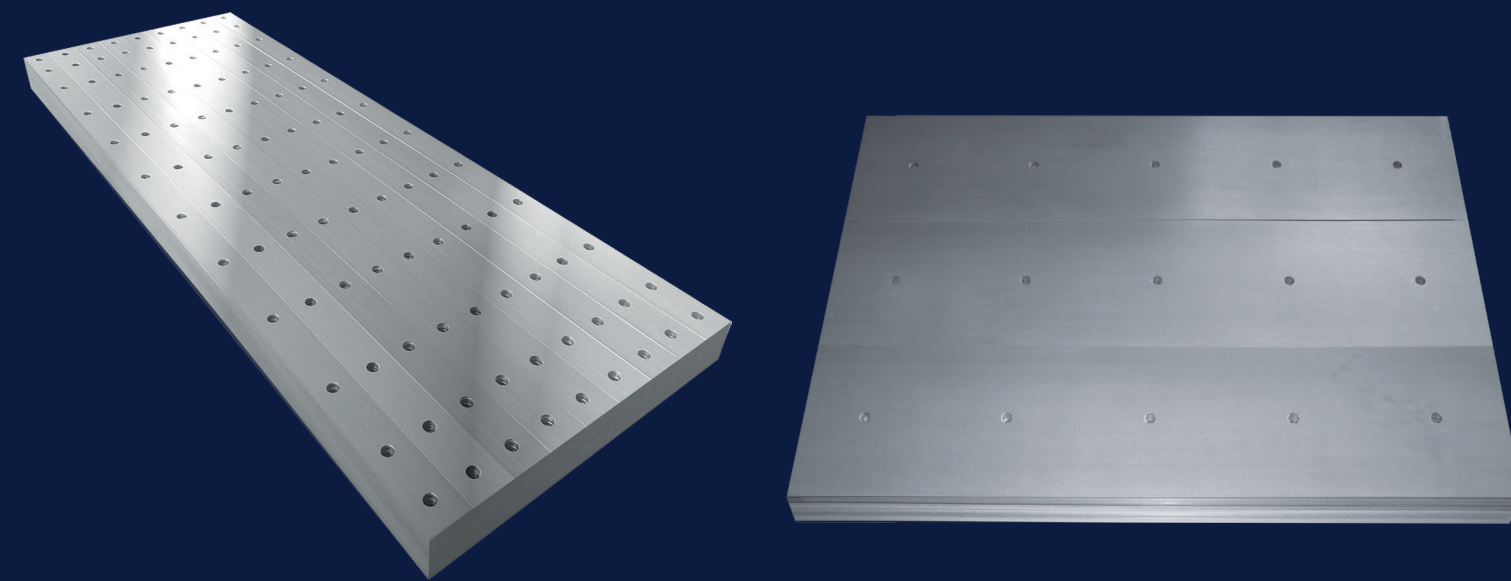

Transelit Int. was founded in 2002, building on many years of experience in the electrical steel sector. The company is based in Znojmo (Czech Republic), right on the Austrian border. Its location in the heart of Europe was strategically chosen to strengthen access to the Northern European market.

From the beginning, the company's goal has been to consolidate its presence in this area by offering just-in-time service with direct support, flexibility, and fast deliveries.

Today, thanks to the dedication of its employees and continuous investments, Transelit Int. provides customers with a wide range of products, including cut laminations and assembled cores for low-voltage and traction transformers.

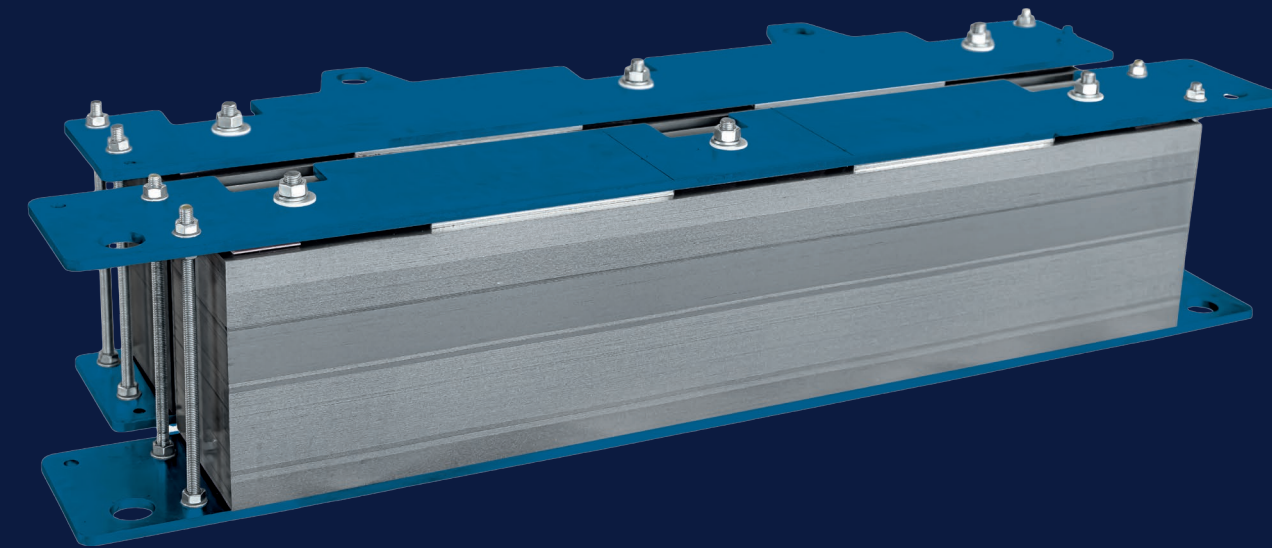

CUT LAMINATIONS

We supply cut laminations with 90° cutting, manufactured according to customer specifications.

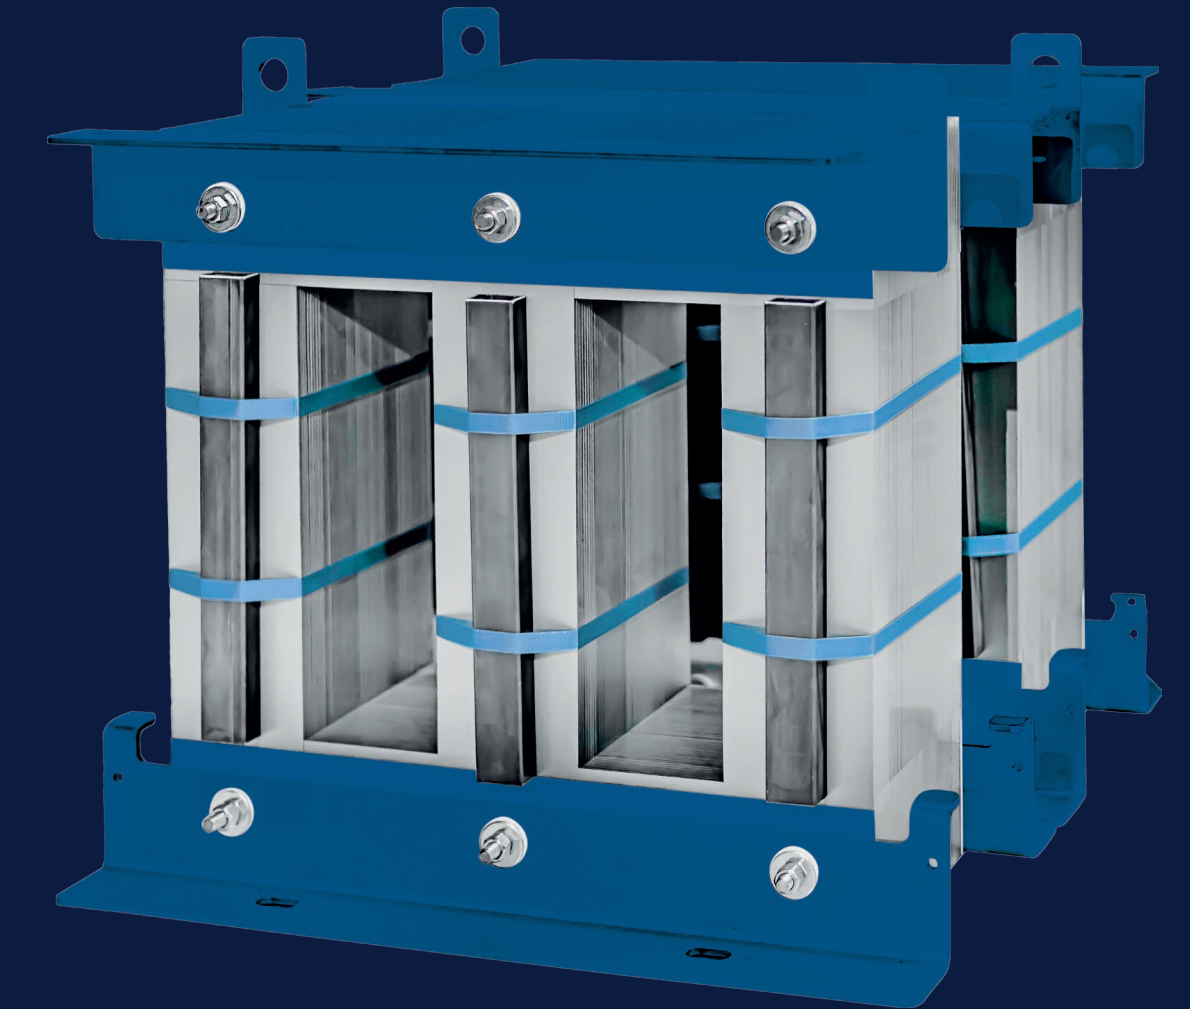

PREASSEMBLED CORE BLOCKS

To meet all customer needs, we provide fully customized preassembled core blocks, designed for any type of application.

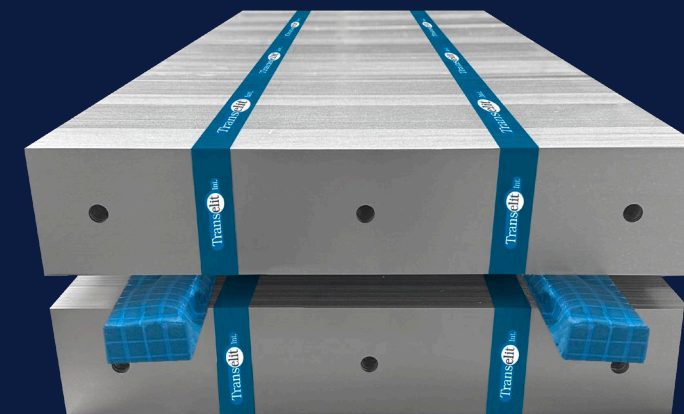

ASSEMBLED CORES

“ We work hard everyday to improve the quality of our products, through passion and continuous innovation ”

TAPED BLOCKS

“ We are committed to provide high-quality products and services as a reliable and trusted partner to our customers ”

ASSEMBLED CORES

Our magnetic cores are assembled with steel clamps, stainless-steel flitch plates, insulation, and hardware according to customer specifications. Translit Int. guarantees the highest assembly precision, fully meeting the required specifications and tolerances.
